

On exiting the Slavery Prison System

Julian DeVante

October 7th, 2022

Heed my warning

We are on the brink of extinction – not only this prison; also the ‘real’ world outside the prison.

See your prison

In our current reality, ‘we live in a people farm and we pay to be alive’ –Max Igan

Is there a conspiracy to keep you from knowing yourself? - The more one knows themselves the more one comes closer to the creator God. Clever distractions are created to keep you looking at nonsense, lies and fabrications – we fill our time with fictions, accumulating useless information instead of looking at ourselves and the real reality.

Are we living in a subtle sophisticated - technological slavery system?

If one takes a deeper look at our daily existence we may begin to see the various levels of our enslavement.

The world in our head is constructed from movies-TV and other media. If we turn away from that fiction for a moment and take a hard look outside – slowly we would begin to see the prison.

What tools allow the system to exist?

Lies, deceptions, trickery and fabrications are the main tools of control but there are far more subtle tools such as mind-control, social-engineering and chemicals.

The greatest tool however; is money – ‘They’ print money from thin air and you have to work for it.

(1) The fact is money has no value - it is our agreement to use money - our energy and time that gives it a perceived value; hence, this is one of the exit to this slavery system.

(2) One of the primary strategies used on human beings is dependency – Luring you into dependency on ‘their system’ for all things, this includes money, food, energy and security. You will have to pay for everything - you pay to be alive.

This dependency is rooted in you being off the land, not owning land. Great efforts are made to make the city seem attractive – to get you into the city.

Once you are in the city - you become domesticated - controlled and fully enslaved. A city is simply a controlled prison by another name.

Exit from Slavery

With land - one begins to become independent - land is provided by the Creator God to you for living in abundance. With land, one can grow food; raise cattle build a house, have a well for water and produce your own electricity/power - live with nature. With land, one can be healthy; this health is a base for your spiritual growth.

This health and well-being can lead to wholesomeness as a human being. This is the greatest blessing the natural world has to offer us.

With land there is no rent, taxes, bills and no controllers. No dead entities such as corporation or government to tell you what to do or how to live, advertise products to you – use you and your family as a resource to be harvested for their own enrichment.

No Government, Monarchy or corporation should own land.

Why? Because they are 'dead entities' and land is for the living – Alive Human Beings.

The land belongs to all flesh and blood human beings. There is enough land for at least 100 Billion People. Over population is a lie.

One Clear Future

The heart of Religion - The Lord provides one of many keys to our freedom.

The heart and soul of real religion is + Sharing +. The secret is sincerity.

The Master Key is: Sharing in sincerity.

- ❖ *Sharing our compassion, our joy, our love and our abundance with our brothers, sisters and children of this place.*
- ❖ *In a Future filled with freedom, sharing is the golden key.*

So how can we be free from slavery?

We start building a community, a society based on sharing not on accumulation of fake wealth, not on paying to be alive.

I am not talking about communism - in which a state entity controls everything.

Remember the original order

God

Man

Later we added - Other (Government etc)

The true way of things has been corrupted: the current state is now:

Government (and or other)
Corporations
Man

The original order must be restored

In building a community, a society and a 'world' based on sharing we move away from dependence - from paying to be alive and from accepting anyone or entity ruling over us.

We restore the original order and remove parasites:

God
Man

We help each other, we do what we love and out of that passion - we share what we reap based on our own freedom of giving.

An example:

If I have a piece of land, grow some vegetables and fruits. I choose to share with others at a community market where everything is free.

When someone comes and ask for some fruits - they may say: "May I have some grapes? I am so and so and can share with you in return something or a service.

If you accept their offer - You may choose to say "yes, that sounds good or no thanks - just have the grapes - hope you enjoy them as much as we do"

This is not barter – as with barter one need to exchange goods or services – a trade of something is required. Here, we simply decide if we want to give or not give– if something is offered then you can choose to accept or not accept. Everyone is there to share.

No more Economy

Remember, economy exist to extract resources from the poor and give it to the rich. This is what led to the apparent nightmare we are currently in.

A market you and your family can walk to

An open and free 'meeting place' (market) for sharing

- ❖ Real friendships are made here
- ❖ Real conversations are engaged in freedom -no censorship/restrictions
- ❖ Life becomes a shared experience
- ❖ People may choose to spend their time on what they are passionate about or explore what they are interested in
- ❖ Gone would be the day of looking at 'the other' as the enemy - a competitor.

Which world would you like yourself and family to live in? The 'sharing' world or the dystopian mind-controlled fiction we currently inhabit?

In the 'Sharing' world:

- ❖ No one comes between you and our human family. There are no 'thought crimes', no tax collector, no greedy corporations, no banks and no military to wage war on each other's children.
- ❖ It is a real life - lived between human beings. If there are disputes and squabbles, the community resolves it without courts and prisons; in a human way, with compassion and fairness. It is resolved directly and timely.
- ❖ In a sharing world there is no hunger, poverty, etc – many (not all) ills automatically disappear.

This is a life worth living in which our children and future human beings prosper.

This way, we reclaim our "world" from the prison that was created around us. This is one of the solutions hidden in our holy books.

We can create this reality if we so choose. It starts with each of us as individuals choosing to grow - away from governments, banks, corporations, war/military and all the vested interest that are sucking our life force.

Right now, we are enslaved because we are dependent on the system for everything – The system is designed to promote the darker polarity of our alive energies – it is setup to push us to fight each other and ourselves. In a sharing world we are free because we are not dependent and everything we need is shared out of *sincerity*. True Freedom promotes the positive polarity of our energies.

Despite the 'programming' of TV, Movies, Internet and possibly your casual experience with people - You may be shocked and surprised at the power of the Human Heart! –

A healthy and wholesome human being is OVERFLOWING with compassion, empathy, helpfulness and Love! Of course they will have their ups and downs too, but that is secondary.
